PROFILE

Full-stack developer specializing in web applications and AI-based solutions. Experienced in backend architecture, APIs, and modern frontend frameworks.

PROFESSIONAL EXPERIENCE

Alten - Fès | Full-Stack Developer

Apr 2026 - Present

- Working on AI-generated test plans from SFD using RAG architecture
- Developing backend logic and integrating with internal systems
- Collaborating with team on test automation strategies

Tutassur - Tangier | Full-Stack Developer

Nov 2024 - Jul 2025

- Website creation: Developed a new company website ensuring an intuitive interface and optimized features.
- <https://www.tutassur.com/>
- Internal application maintenance: Integrated new features, fixed bugs, and optimized performance to enhance user experience.

Logiciel Lab - Tangier | Full-Stack Developer

Apr 2024 - Jul 2024

- Developed and integrated complex user interface designs.
- Designed data models following best practices to ensure scalability and performance.
- Implemented API communication with Axios, improving data exchange between front-end and back-end systems.
- Managed and optimized local databases using SQLite for efficient data storage and retrieval.
- Provided technical support and solved complex issues to ensure smooth project delivery.

FCPO - Oujda | Web & Desktop Developer

Oct 2022 - Dec 2023

- Designed and implemented RESTful APIs using Symfony and Laravel, enabling seamless data integration for web and desktop apps.
- Integrated third-party services such as Google Maps API to enhance location-based functionalities.
- Developed a booking system using APIs to manage real-time reservations and data synchronization.
- Used AJAX, jQuery, and Axios for dynamic content loading and improved UI interactions.
- Mentored junior developers, strengthening their skills and contributing to team success.
- Maintained and improved existing applications, ensuring continuous user satisfaction.
